LLM embedding space (2-D illustration)

Ranking of the candidate items

item	$\cos(\mathbf{z}_u, \mathbf{z}_i)$	
i_4	0.999	**recommended**
i_5	0.940	**recommended**
i_6	0.891	
i_2	0.708	
i_1, i_3	excluded: already in $\mathcal{N}_u$	

score: $\hat{y}_{u,i}^{\text{KNN}} = \cos\theta = \cos(\mathbf{z}_u, \mathbf{z}_i)$
(only the direction of the vectors matters)

top-K items of $\mathcal{I} \setminus \mathcal{N}_u$ (here $K = 2$; $K = 5$ in the experiments). No training is needed.
